HORTICULTURE DIVISION I - RULES

1. All Cut specimens will be exhibited in clean clear or brown (easily seen through) containers. Some Containers are available at the State Fair but exhibitors may bring their own containers to assure size and shape. Cut stem(s) should be viewed easily through the container. Unobtrusive glass marbles or pebbles may be used for ballast but not as wedging.
2. Wedging made of clear plastic, plastic film, or wood may be used.
3. Exhibitor must list botanical name for each exhibit. This includes genus, specific epithet (formerly known as species), variety or cultivar. The correct format is to underline the Genus and specific epithet; the cultivar is in single quotation marks beginning with a capital. See a more detailed explanation on the last page of this schedule. A card placed by the exhibit may be used to name exhibits having more than one specimen.
4. Annuals/ biennials, herbaceous perennials, houseplants, and bulbs must be in the exhibitor's possession for at least 90 days.
5. Arboreal exhibits must have been in the exhibitor's possession for six (6) months.
6. Container grown plants must have been in the exhibitor's possession for at least 90 days. The maximum container diameter for this show is 15". An exception of the 90 days is made for annuals that have a shorter time from germination to maturity. Combination Plantings must be grown together at least 6 weeks.
7. Exhibitor may only enter more than one (1) Exhibit per class in **SECTIONS A through J, if each exhibit is a different specific epithet, variety, or cultivar.**
8. An exhibitor may enter only one (1) exhibit per class in **SECTIONS K through O due to space constraints.**
9. An exhibitor may **NOT** enter an exhibit in an 'any other' class if the exhibit's class is listed before or after on this schedule.
10. Plant Material must be in its natural state and may not be altered by application (treatment) with oil, commercial 'shine' products, etc., that change the natural appearance. No wiring of specimens is permitted.
11. Specimens should have one (1) to two (2) sets of foliage. Unattached foliage is never included with a cut bloom specimen or under the waterline except for *Gladiolus*.
12. The Award of Horticultural Excellence is offered if merited to the highest scoring exhibit of 95+ in the entire Horticultural Division

DIVISION II -DESIGN - “MAIN STAGE ENTERTAINERS”

Unless otherwise specified, exhibits in **SECTIONS A – E, MAY** include a staging panel and/or underlayment to enhance the exhibit. These are to be provided by the exhibitor. All panels and/or underlayment materials must conform to the dimensions stated in each SECTION.

SECTION A: “BRUCE SPRINGSTEEN” Eligible for a Tricolor Award if merited

The design is not to exceed 28” wide, by 24” deep, by 40” high. Must contain all fresh plant material. Staged on a part of a table approximately 29” high with a white covering. No dried plant materials or decorative wood is permitted in this SECTION. One (1) exhibit for Tricolor Award must score 95 points or more, be a first place blue ribbon winner, and meet all criteria associated with the SECTION Award.

Class 1: “I’M GOING DOWN” A Cascade design with emphasis on downward rhythmic movement. The design is supported by a container or device. Downward lines may be curved, straight, zigzag, interrupted and may be a combination. A minimum of components may extend upward.

Class 2: “MY HOME TOWN” An American Traditional Design in which plant material is used in a naturalistic manner with little or no abstraction. The over-riding shape is a simple geometric form like a sphere, cylinder, or pyramid, etc.

Class 3: “ DANCING IN THE DARK” A Transparency design, with see-thru elements, integral to the design and permitting some components to be viewed through others.

SECTION B: “LADY GAGA” Eligible for Designer’s Choice Award if merited

Staged on a table approximately 29” high with a white covering. The design is not to exceed 28” wide by 24” deep by 40” high. One (1) exhibit eligible for Designer’s Choice Award, must score 95 points or more, be a first place blue ribbon, and meet all the criteria associated with the SECTION Award.

Class 4: “THE EDGE OF GLORY” A parallel Design consisting of three (3) or more groupings plant material with a strong parallel placement. A single container and/or base or multiple containers/bases may be used if combined to appear as ONE unit. Groupings do not need to be equidistant from each other. A connective(s) may be used at the base of the design.

Class 5: “POKER FACE” A Still Life Design creating a moment in time using functional and realistic objects with a message or theme. The objects are more dominate in the design than the plant material or flowers. The plant material may or may not be flowers, such as fruit, or vegetables as it relates to the functional items.

Class 6: “SHALLOW” A Low Profile Design to be three dimensional incorporating three (3) or more design techniques (for example: manipulating leaves, grouping, weaving, binding, pave’). Design should be four times as long and/or wide as it is high. Designs will be judged from above.

SECTION C: “KEITH URBAN” Eligible for Petite Award if merited.

Plant Material stated in each class. These will be staged at eye level, on multileveled risers, which are placed on the top of a table approximately 29” high with a white covering.

One (1) exhibit eligible for Petite Award, must score 95 points or more, be a first place blue ribbon winner, and meet all the criteria associated with the SECTION Award.

- Class 7: "DAYS GO BY" - All dried material must be used. 5" maximum size in any dimension.
 Class 8: "SOMEBODY LIKE YOU" Designer's choice of plant material. 8" maximum size in any dimension" –
 Class 9: "YOU'LL THINK OF ME" All fresh plant material must be used. 12" maximum size in any dimension.

SECTION D: "BLAKE SHELDON" Eligible for Award of Distinction if merited

All dried material, staged on a table approximately 29" high with a white covering. The design is not to exceed 28" wide by 24" deep by 40" high. One (1) exhibit eligible for Award of Distinction , must score 95 points or more, be a first place blue ribbon, and meet all the criteria associated with the SECTION Award.

Class 10: "SANGRIA" Vertical Design

Class 11: "TEN TIMES CRAZIER" Abstract Design.

How to Write a Scientific Name ©

The system of nomenclature used today is based on the binomial system of nomenclature, developed by Linnaeus in the late 1700's. The binomial system of nomenclature is structured so that the scientific name of a plant consists of two names: (1) the genus or generic name, and (2) the specific epithet or species name. There are rules to follow when writing a scientific name.

Genus Name

- 1 The genus name is written first.
- 2 The genus name is **always** underlined or italicized.
- 3 The first letter of the genus name is always capitalized.

4 Example: Sansevieria or *Sansevieria*

● Specific Epithet (formerly known as the species)

1 The specific epithet is written second.

2 The specific epithet is **always** underlined or italicized.

3 The first letter of the specific epithet name is **never** capitalized.

4 Example: trifasciata or *trifasciata*

● Scientific Name

The scientific name of this plant would appear as follows:

Sansevieria trifasciata or *Sansevieria trifasciata*

What About Mutations?

The evolution of plant life is based on mutations, which are constantly occurring. Very often a particular individual of a species will mutate to a different color, size, or growth habit. These characteristics are passed on to its progeny (offspring). When this happens, a population of plants exists with the same scientific name, but a sub-group exhibits different characteristics. If the mutated group is significantly different from the parents and is stable (the traits are passed on from generation to generation), then this new group of plants is often assigned a **variety** name.

● Variety Names

1 Variety names are given when the mutation occurs **in nature**.

2 Examples: a mutation occurs in a tropical rain forest

3 The abbreviation **var.** is used to signify that the mutation is a variety. var. is placed after the specific epithet and is **not** underlined or italicized.

4 Example: Sansevieria trifasciata var.

5 The variety name is written after var.

6 Capitalize the first letter of the variety name only if it is a proper noun.

7 Underline or italicize the variety name.

8 Example: Sansevieria trifasciata var. Laurentii or *Sansevieria trifasciata* var.

Laurentii

Mutations can also occur because of human interventions such as breeding, applying mutagens, propagation, or by cultural practices. In these cases, the new group of mutated plants is called a **cultivar**. "Cultivar" is an abbreviated form of cultivated variety. The mutated plants are assigned a cultivar name.

● Cultivar Names

1 Cultivar names are given when the mutation occurs **due to human influence**.

2 Examples: a mutation occurs in a garden

3 The abbreviation **cv.** is used to signify that the mutation is a cultivar. cv. is placed after the specific epithet and is **not** underlined or italicized.

- 4 Example: Sansevieria trifasciata cv.
- 5 or single quotes are used instead of cv.
- 6 Example: Sansevieria trifasciata 'Name'
- 7 The cultivar name is written after cv. or within the single quotes.
- 8 Capitalize the cultivar name.
- 9 **Never** underline or italicize the cultivar name.
- 10 Example: Sansevieria trifasciata cv. Golden Hahnii or
- 11 *Sansevieria trifasciata* 'Golden Hahnii'
